### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: There is no prior art of record alone or in combination that teaches an intravaginal device for occluding having first and second pressure applying occluding element pivotally secured to first and second distal shaft sections respectively AND adapted for pivoting independently AND at least a first mechanism or actuator to distally extend at least part of the first pressure applying occluding element away from the shaft. With respect to claim 41, there is no prior art alone or in combination that teaches an intravaginal device for occluding having first and second occluding members pivotally secured to the distal end of first and second shafts respectively, first and second extending actuators for moving the occluding elements away from the proximal end of the device, AND first and second rotating actuators for selectively rotating each occluding member.
2. The closest art of record: Hasson (US 5,562,680) has occluding members that extend distally but there is no motivation to pivotally secure the occluding members to the shaft; and Hasson (US 4,944,741) has occluding members that are pivotally secured to the distal end of the shaft, but the occluding members do not pivot independently there is only one mechanism for extending and rotating.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
